# ENVIRONMENTAL POLICY

---

Version 2, 07. August 2019

## ENVIRONMENTAL POLICY

---

In our company, the environment is considered an important part of corporate policy. We are aware that our activities have an impact on the environment. This is why it is our obligation to reduce the environmental impact to the minimum possible within the limits of economic and technical possibilities and by means of well thought-out processes.

As a result of our shared responsibility towards people and the environment, we have set ourselves the goal of reconciling profitable production and environmental protection by improving environmental performance and avoiding or reducing environmental pollution where this is technically and organisationally possible and economically viable. It is a matter of course for us to comply with and where possible exceed the requirements set out in legal provisions, other environmentally-related interests as well as our own environmental protection standards.

Every employee in our company has the right and the duty to work towards eliminating any circumstances that create an unnecessary burden on the environment. Through information and training, we promote an environmentally conscious behaviour of our employees inside and outside the company.

For us, the continuous improvement of our environmental services in the medium and long-term is also a prerequisite for an effective reduction in costs and an important contribution to the protection of the environment.

Smooth-running organisation, progressive management methods and environmental technology provide the necessary framework for this. Managers are required to apply the management practices applicable in their area of responsibility, to monitor their effectiveness on an ongoing basis and to adapt them to the latest knowledge and requirements.

By making this statement, the management is obliging all employees to carry out their activities in accordance with the instructions to ensure that the environmental undertakings comply with the statutory and self-imposed requirements and the

expectations of the company.

Our goal is the continuous improvement of our environmental performance. We provide all the necessary means to meet our environmental objectives and enforce environmental policy.

Management undertakes to continuously improve environmental performance and to comply with all environmental requirements
